

AJPH Call for Papers

Evolution of Public Health
Emergency Management

A PUBLICATION OF THE
AMERICAN PUBLIC HEALTH ASSOCIATION

The *American Journal of Public Health (AJPH)*, in collaboration with the Centers for Disease Control and Prevention (CDC), intends to publish a supplement issue on the topic of **The Evolution of Public Health Emergency Management from Preparedness to Response and Recovery**. This issue will showcase the emergence of public health emergency management as a discipline in the United States since September 11, 2001, by highlighting innovative and effective evidence, strategies, solutions, and policies to achieve functional public health emergency management programs with demonstrated preparedness capabilities. Original epidemiological, social, and clinical research and evaluation articles, perspectives, and critical reviews of challenges and successes in public health emergency management are invited. Papers that highlight transformational practices as well as evaluation or policies that demonstrate advancement across 15 public health preparedness capabilities defined by CDC (<http://www.cdc.gov/phpr/capabilities>) are encouraged. Topics of interest include best-practice models, gaps in research, policy and practice implications related to biosurveillance, community resilience, countermeasures and mitigation, incident management, information management, and surge management and support.

Potential authors should visit the *AJPH* website (www.ajph.org) to review the Instructions for Authors and specific guidelines for the various types of manuscripts. All manuscripts will undergo standard peer review by the *AJPH* editors and peer referees as defined by *AJPH* policy. Manuscripts must be submitted to *AJPH* by **January 15, 2017**, via the online submission system at <http://editorialmanager.com/ajph>. For additional information about this supplement, contact Linda Ekperi at LEkperi@cdc.gov.

Guest Editors: Tanya Telfair LeBlanc, PhD, MS, Rachel Nonkin Avchen, PhD, MS, and Christine Kosmos, RN, MS. All Guest Editors are with the Centers for Disease Control and Prevention. AJPH Associate Editor: Robert Kim-Farley, MD, MPH.
