

Podcast_July 2017

Welcome to the Editor's monthly podcast of AJPH. This is Alfredo Morabia, I am the Editor-in-Chief. We are June 6 2017.

In this issue of AJPH we discuss of chemical risk assessment with Associate Editor Michael Greenberg, who is also a Distinguished Professor and Associate Dean of the Faculty at Rutgers University and with Dr Maureen Gwinn who is a senior science advisor for the Office of Research and Development of the Environmental Protection Agency. What these two interviews show is the need to assemble large team of scientists from a wide range of domains of expertise and give them the intellectual space to tackle the often complex questions that need to be solved to protect our health from the environmental risks. A task that only a federal agency such as the EPA can handle.

I am now calling Associate Editor Greenberg.

[Interview]

Let's call Dr Maureen Gwinn, she works in Washington DC, at EPA headquarters. I began to ask her what is the Office of Research and Development to which she belongs.

[Interview]

All of the articles mentioned in this podcast are available in open access.

Note that to be immediately informed about the papers soon to be published in AJPH or about calls for papers, follow me on twitter.

The Rhythm and Blues groove is composed by Francis Jacob and features Kofo the Wonderman, a Nigerian singer who lives in New York City.

Thank you for listening. This is Alfredo Morabia at AJPH. For more podcasts, including podcasts in Chinese and Spanish, visit us at AJPH.org
